5.4 **Communications:** Chad Homme reported his involvement on several projects including the CAD mobile software for Windows 7, Minitor 6 pagers, and radio reprogramming to 2014 Cal-Fire channels. Contact him if you have any communications needs.

6. **Agenda Items**

6.1 **Nomination and Election of Officers for FY 14/15 – Chairman, Vice-Chairman, Clerk/Secretary**

Motion made by Chief Lohman to close nominations and proceed to elect current officers - Chief Passalacqua, Chairman; Chief Hall, Vice-Chairman; Melba Hibbard, Clerk/Secretary. Seconded by Chief Skiles. Motion passed.

6.2 **Approval of the 2014-2015 Stanislaus County Fire Authority Business Plan:**

Chief Passalacqua presented the 2014-2015 Business Plan. The recommended major program change is to add a training component. The projected cost to add training for 2014-2015 is \$53,000. In the past, the county fire agencies' portion of the Regional Fire Training Center (RFTC) agreement was paid individually by each signatory agency. With the approval to use Less Than County-Wide dollars to fund the county fire agency portion of the contract, each agency will not need to individually budget for reimbursement. Also, partnering closely with Modesto Junior College (MJC) enhanced distance education capabilities, such as online courses, that will be available to fire districts. It was also suggested to begin work on revisions of the Business Plan in January instead of June each year to allow ample time for suggestions and changes. Chief Passalacqua presented each position currently funded with a 4% increase projected for fiscal year 2014-2015.

Motion made by Chief Bradley to recommend to the County Board of Supervisors that the Less Than County Wide Fire Tax be returned to districts where funds are generated. No second. Motion failed.

Motion made by Chief Breasher to approve the 2014-15 Business Plan and forward it to the County Board of Supervisors. Chief Klevmyr seconded the motion. A roll call vote was taken. Yes – 12; Noes – 3 Motion passed.

The next regular meeting is scheduled for September 4, 2014.

Meeting was adjourned at 930 hrs.

Respectfully Submitted,

Melba Hibbard

## ***Fire Communications Report September 4th, 2014***

The Fire Communications Branch of the Stanislaus County Fire Authority is dedicated to assisting member agencies in providing communications assistance, direction, and training of the communications systems within Stanislaus County.

### **CAD**

Over the past several months, we have had several meetings and conference calls discussing upgrading our CAD mobile and server applications. We are continuing to work towards upgrading our system, and an official letter has been sent to the vendor requesting certain deliverables, on-site support, and a timeline for upgrades to be completed.

### **MDC Support**

Over the past couple months, I have assisted several agencies with MDC repairs. We are continuing to work with the CAD vendor, and are prepared to migrate to Windows 7, once we have a deployable version that the vendor supports.

### **Active911 Application**

Over the past several months, I have worked with various Fire Agencies throughout Stanislaus County to setup Active911 for their agencies. If you have not seen this application, please visit [www.active911.com](http://www.active911.com) for more information. If your agency decides to start using this application, I am happy to assist and create the link from HipLink to Active911 for your agencies.

### **Radio Programming/MDC Signaling Updates**

The countywide radio reprogramming has been completed. As part of the follow up, I have taken notes while programming all of the agencies, and have updated the MDC-1200 (Push to Talk ID) spreadsheet, with the correct resource names/locations. I am continuing to work with several departments that are revising their identifiers as well.

### **Radio Cache Updates**

Recently, all of the radio cache's stored at SR911 have been deployed. They have all been returned and refurbished, and are back in service. Please remember, if you take a cache of radios out, to return them with new batteries. The incidents will provide these for you at the supply unit, as they are a consumable that is used on the incident. Also, please clean the radios upon your return from an incident. A microfiber

towel and a little bit of time, and they can be cleaned right up. If you discover any issues with any radios, please let us know when you turn them back in.

### **Tac 9 Radio Frequency Update**

We have been successful in our re-licensing of the Tac 9 radio frequency. SR911 has been notified of the license and will begin utilizing Tac 9 again.

### **ROSS Support**

Over the past couple months, I have routinely been supporting operations within ROSS to monitor our out of county resources, and to get early notification of potential deployments as well as tracking out of county resources.

### **Exciting Technology to Follow Communications Coordinator**

For quite some time, I have been posting Weekly Status Reports on a Google Calendar. I would invite anyone with a Google account to go into your calendar and to add [XST.Communications@gmail.com](mailto:XST.Communications@gmail.com). This will add a calendar to your calendar, and you will see, every Friday, at 4PM, a posted log that shows what tasks have been completed for the week. This is a great way for everyone to check in and see what's going on within our County.

### **Communications Needs**

If anyone has any specific communications needs, please contact me directly to address your questions, concerns, or needs.
